SUMMARY

- Highly motivated Full Stack Developer with expertise in Data Structures & Algorithm(C/C++), Software Development and Data Analytics. Proficient in designing scalable applications and solving complex problems with efficient, optimized solutions. Hands-on experience with cloud technologies including SAP ecosystem and AWS, with a focus on building reliable, high-performance systems. Strong analytical mindset, quick learner and committed to delivering clean, maintainable code in fast-paced environments.

SKILLS & ABILITY

- **Languages :** C, C++, JavaScript, Python, SQL
- **Technologies & Tools :** React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, Angular, JSON, SAP Basis, AWS, Rest API, CI/CD, DSA, Agile Methodologies

EXPERIENCE

- **Sumeru Digital Solutions PVT LTD | Software Developer – Intern** **Nov 2025 – Feb 2026**
- Developed and deployed multiple scalable web applications using the MERN stack. Built and integrated RESTful APIs, improving data communication efficiency. Performed API testing and validation using Postman, ensuring reliability & performance. Implemented authentication and authorization mechanisms for secure access control. Used GIT & GitHub for version control and collaborative development in an agile environment. Optimized application performance by improving API response times and reducing redundant data calls. Collaborated with cross-functional teams to debug issues, implement new features and improve UI/UX responsiveness.
- **VTU | Web Development and React with Python – Intern** **Feb 2025 – May 2025**
- Completed hands-on training in Full Stack Development with focus on React.js and Python backend technologies. Developed 5+ responsive web interfaces using React.js, HTML5, CSS3 & JavaScript (ES6+). Implemented CRUD operations and integrated REST APIs for dynamic data handling. Built reusable React components and applied component-based architecture for scalable UI development. Optimized frontend performance by improving load time and rendering efficiency. Applied asynchronous programming for efficient API communication also worked with JSON data handling & state management in React.

EDUCATION

- **Sri Sairam College of Engineering (VTU), Bangalore | B.E - Computer Science and Engineering - 2025**
CGPA - 7.1
- **Holy Cross Matric Higher Secondary School | PUC – PCMCs - 2021**
Percentage – 82.4%

PROJECTS

- **Appraisal Performance and Payslip Management**
- Developed a role-based Performance Appraisal & Payroll system with secure authentication, digital payslip generation (PDF), approval workflows, and batch payroll processing using React, Node.js, MongoDB, and Puppeteer.
- **Web Application for Malaria Detection with Microscopic Blood Image using Deep Learning**
- Creating a friendly interface between the user and the application with more than 90% accuracy of the resultant.
- **Cab Booking System - Built using Python and SQL (CRUD)**
- This project aims in bringing the best interaction between customer and the drives, which also they can easily manage their past rides. A user-friendly platform where customers and drivers can efficiently manage their trips across various locations by providing security for their personal data and the third party access.

CERTIFICATES

- JavaScript Course Completion Certificate – **Infosys Springboard**
- AWS Certified Developer – Associate Certification – **Infosys Springboard**
- SAP Certified - Backend Developer - ABAP Cloud – **SAP learning**
- SAP Cloud ALM – Course Completion – **SAP Learning**
- Exploring SAP BTP – Course Completion – **SAP Learning**
